

Mentoring Relationships for Stronger Research Workshop
 Room P4 1-4pm Thursday 21 April 2016 Brisbane Convention Centre

Aims of workshop:

The aim of the workshop is to provide education and training in the area of research mentoring, tailored to the Medical Radiation profession, to equip people to undertake this role in their workplaces. This workshop would enable attendees to develop robust and supportive research groups in their own place of work and network with like-minded professionals.

Workshop format:

Presentations from experienced health researchers and mentors, shared mentoring experiences from current researchers, discussion and exercises on finding mentors and evaluating the mentor-mentee relationship
